

# Improved Oil Conditioning Unit for hydraulic pitch systems

Now with C. C. Jensen filter!

## Increase Annual Energy Production

No more overheated hydraulic oil, particle contamination or low pressure in the hydraulic pitch system! The new edition also removes varnish from high oil temperature issues and gets rid of the water in your oil.

With Fritz Schur Energy's Oil Conditioning Unit that allows for independently controlled offline filtration and cooling of the hydraulic oil 24/7, you can improve the oil quality and thus the operation of your turbines.

### Upgrade your turbine and secure:

- Improved lifetime on all components in the hydraulic pitch system
- Improved lifetime of your hydraulic oil
- Efficient continuous offline filtration of the hydraulic oil
- Efficient continuous cooling of the hydraulic oil – controlled by independent thermostat
- Higher uptime and thereby increased earnings
- "Plug and play" installation with all necessary components
- Customization to fit any hydraulic pitch system

50Hz	
FSE part no.	Description
301680	Oil Conditioning Unit - 50 Hz - CCJ 2.3MW Mk2
301682	Oil Conditioning Unit - 50 Hz - CCJ 2.3MW Mk3
301684	Oil Conditioning Unit - 50 Hz - CCJ 2.3MW Mk3V2

60Hz	
FSE part no.	Description
301681	Oil Conditioning Unit - 60 Hz - CCJ 2.3MW Mk2
301683	Oil Conditioning Unit - 60 Hz - CCJ 2.3MW Mk3
301685	Oil Conditioning Unit - 60 Hz - CCJ 2.3MW Mk3V2
